

# THE iLOQ KEY IN A NUTSHELL

The lock and the key function without batteries, because the locking system is powered by key insertion. All individual access rights are programmed into the iLOQ Key. These access rights can be modified at any time. Because all locks can be reprogrammed, the access rights of a lost key can be quickly and easily removed from the system.

## WHERE DO I GET A NEW KEY?

Contact your key management person. Your new key will be quickly programmed.

## HOW DO I TAKE CARE OF MY KEY?

The key has no battery and it is made out of stainless steel. It stands hard wear, water and cold. An iLOQ key is maintenance free.

## I LOST MY KEY, WHAT SHOULD I DO?

Immediately notify the person responsible for key management. The locks will be updated and the lost key will no longer have access. The security level of the building is restored.

You may have the previous version of the iLOQ key in use.
